## DETAILED ACTION

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 39, 47, 52-56, and 61-63 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

A broad range or limitation together with a narrow range or limitation that falls within the broad range or limitation (in the same claim) is considered indefinite, since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired. Note the explanation given by the Board of Patent Appeals and Interferences in *Ex parte Wu*, 10 USPQ2d 2031, 2033 (Bd. Pat. App. & Inter. 1989), as to where broad language is followed by "such as" and then narrow language. The Board stated that this can render a claim indefinite by raising a question or doubt as to whether the feature introduced by such language is (a) merely exemplary of the remainder of the claim, and therefore not required, or (b) a required feature of the claims. Note also, for example, the decisions of *Ex parte Steigewald*, 131 USPQ 74 (Bd. App. 1961); *Ex parte Hall*, 83 USPQ 38 (Bd. App. 1948); and *Ex parte Hasche*, 86 USPQ 481 (Bd. App. 1949). In the present instance, claim 39 recites the broad recitation "the movement of the broken-out piece by the breaking-out tool", and the claim also recites "adapted to be transferred into an angle of inclination" which is the narrower statement of the range/limitation, claim 55 recites the broad recitation "finger-

like fork prongs", and the claim also recites "flat cross-section" and "a free end of a pressure pin is in the form of a rough surface" which is the narrower statement of the range/limitation. A broad range or limitation followed by linking terms (e.g., preferably, maybe, for instance, especially) and a narrow range or limitation within the broad range or limitation is considered indefinite since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 39 and 52-53, as best understood, are rejected under 35 U.S.C. 103(a) as being unpatentable over Raveleau (US 6,102,268).

Raveleau discloses the invention substantially as claimed except for a dovetail-shaped configuration. However, Raveleau also teaches (col. 3, lines 38-39) that a head portion can be a large number of shapes. It would have been an obvious matter of design choice to make the different portions of the cross-sections of a receiving groove and the portion forming a coupling rib of whatever form or shape was desired or expedient. It is noted that the invention would perform equally well with the arrangement shown on Raveleau and changing the head portion to dovetail shape configuration with a corresponding recess would perform the same functions. Applicant should note that the limitation "support means" is not in compliance with the

Art Unit: 3724

Supplemental Guidelines published in the Official Gazette on July 25, 2000. Such limitations cannot be used to invoke 35 USC 112, 6th paragraph, and have therefore been given their broadest reasonable interpretation, without considering equivalence.

5. Claims 54-56 and 61-63, as best understood, are rejected under 35 U.S.C. 103(a) as being unpatentable over Raveleau (US 6,102,268) in view of JP 08294898.

The modified device of Raveleau discloses the invention substantially as claimed except for a rough surface. JP 08294898 teaches a pressure pin having a free end with a rough surface (10, 11). It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide a rough surface as taught by JP 08294898 on the modified device of Raveleau in order to provide firm engagement of a tool to the workpiece such as to prevent the workpiece from sliding away. With respect to claims 61-62, see Figure 6.

### ***Response to Arguments***

6. It is noted that claim 47 is not rejected over the prior art. However, the allowability of this claim cannot be indicated at this time in view of clarity issues.

7. Applicant's arguments filed 03 July 2003 have been fully considered but they are not persuasive.

Applicant contends that Raveleau neither teaches nor suggests treating a waster in a non-horizontal manner since Raveleau teaches an apparatus wherein a waster is treated horizontally.

Applicant's contention is not clearly understood and the examiner respectfully requests applicant to specifically point out how the structure of the instant invention

distinguishes over the modified device of Raveleau. Applicant's arguments fail to comply with 37 CFR 1.111(b) because they amount to a general allegation that the claims define a patentable invention without specifically pointing out how the language of the claims patentably distinguishes them from the references.

***Conclusion***

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
